EXPERIENCE

MapOut   Oct 2021 – April 2022
Full Stack Intern   *Remote/Gurgoan*

- My responsibility includes transitioning from design to code fluently.
- Building custom API and automation processes and supporting my team members within my abilities to ease their work and progress.
- In addition to these some of my extra crucial responsibilities are overseeing software cycle of new features
- Making sure that entire process starting from designing phase till the production is streamlined

Freelance/Contract   Jun 2021 – Sep 2021
Software/Full Stack Intern   *Remote*

- During this period I worked as an contact based Intern for Individuals to build their custom products for their companies and websites landing pages.
- My major line of work was building automation using GCP API's in addition to custom API with python,flask and node.
- I was also entitled with additional responsibilities of maintaining a clean code in github along with testing the API with tools like Postman,cURL as well as with deploying and hosting it in cloud platforms like heroku and netlify.
